

Southern Ohio Medical Center Enables Better Patient Care in Ohio by Prescribing Non-invasive Security Screening with Evolv

Snapshot of Organization

LOCATION

Portsmouth,
Ohio

FOUNDED

1954

SOLUTIONS

2 Evolv Express® Single-lane Systems
Evolv Insights®

Goals

Help staff in Emergency Department feel safe when delivering care

Extend security screening to the main hospital entrance and during after-hours for everyone—patients, visitors, and staff

Ensure security screening is non-intrusive and does not slow the speed of patient ingress and care

Minimize friction of secondary checks by pinpointing the location of threats

Select a vendor with long-term market commitment

Identify a technology that will differentiate between gurneys, wheelchairs, and other medical equipment and actual threats

Enable security staff to focus on interactions with incoming patients, visitors, and staff rather than the technology/medical equipment and actual threats

Outcomes

Identified

Weapons on two individuals within the first hour of deployment

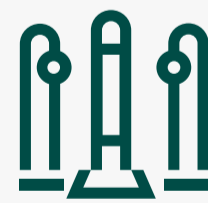

Trained

Security staff to differentiate between weapons and wheelchairs, gurneys, cellphones, and car keys

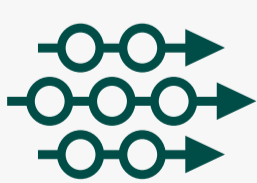

Generated

Very positive feedback from staff, patients, and visitors

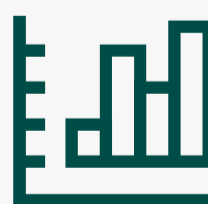

Achieved

Seamless deployment of Express systems at ED and the main hospital entrance

Screen

Everyone entering hospital 24/7—at main entrance and ED

Used

Insights analytics to demonstrate security posture to executive staff and board

Created

Inviting, non-intrusive screening experience for rapid patient ingress
