

New CITYPARK Stadium Adds Evolv to Their Cutting Edge Technology Portfolio to Help Keep Fans Safer

Snapshot of Organization

	LOCATION	MLS TEAM	SOLUTIONS
	St. Louis, MO	St. Louis City SC	4 Evolv Express® Dual-lane Systems
			7 Evolv Express Single-lane Systems
			Evolv Cortex AI® Evolv Insights®

Goals

Ensure seamless flow of fans through security screening and avoid queues of fans in security lines

Achieve higher security accuracy without incurring high alarm rates

Streamline security guard training on security screening technology and process

Enable fans to get concessions, visit retail shops, and reach their seats before the start of the match

Scale to support fluctuations in fan ingress flows

Avoid intrusive, lengthy secondary screening checks

Get 22,500 fans into the stadium in less than 90 minutes

Outcomes

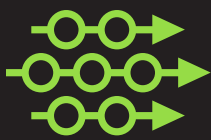

Reduced

Proposed security lane footprint by 63% —from what would have been around 50 metal detectors to 19 Express lanes (or 11 systems)

Reduced

Intrusive, time-consuming secondary security screening process

Screened

Up to 500 fans per minute at four stadium entrances

Created

A safer environment for fans and stadium staff

Used Evolv Insights

To diagnose process bottlenecks at one entrance that avoided an additional system deployment at that entrance

Get fans into the stadium

Quickly so they can enjoy concessions and stadium amenities before the start of events

Achieved

Lower nuisance alarm rate with Evolv compared to metal detectors
