

Virtua Health Selects Evolv for Emergency Department Security Screening Following Comprehensive Evaluation

Snapshot of Organization

	LOCATION	STAFF	SOLUTIONS
	Southern New Jersey	14,000+	• 16 Evolv Express® single-lane systems • 1 Evolv Express ruggedized single-lane system • Evolv Insights®

Goals

Help reduce risk of violence in healthcare settings for doctors, nurses, staff, and patients

Address Culture Survey findings from staff that pinpointed weapons screening as a top concern

Help ensure security screening is less invasive

Handle high volumes of people entering the facilities without significant delays

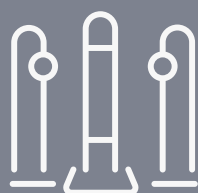

Integrate security screening into the facility layout

Outcomes

Detected

6 handguns on the first day of deployment

Screen

an average of 7,500 people at seven Emergency Departments daily

Generated

positive responses from doctors, nurses, and staff who feel the organization is proactively addressing security and safety

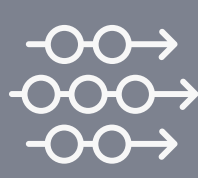

Screen

Screen up to 325,000 doctors, nurses,staff, patients, and visitors at 17 different entrances each month

Enable

doctors and nurses to focus on delivering patient care by reducing the threat of weapons

More

than 500 threats identified each month

Strengthened

partnerships with local law enforcement with dedicated spaces in hospitals for their use

Over

7,500 threats identified since first install
