

Windsor Regional Hospital, the First Canadian Hospital to Deploy Evolv, Screens Thousands of Patients

Snapshot of Organization

LOCATION	FOUNDED	SOLUTIONS
 Windsor and Essex Counties in Ontario, Canada	1928	The Evolv Safer Experience System™ • 2 Evolv Express® single-lane systems • Evolv Insights®

Goals

Help enhance the Emergency Department environments for staff, patients, and visitors

Find an alternative to walkthrough metal detectors that would not delay patient care or be intrusive

Enable security screening of all patients, regardless of mobility

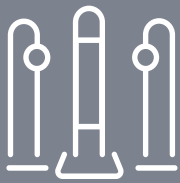

Leverage traffic flow and detection analytics to demonstrate the impact of security screening to executive management and the Board of Directors

Engage with vendor that would answer questions transparently

Outcomes

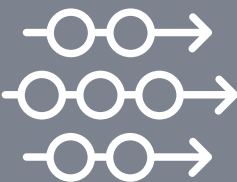

Garnered

recognition as first Canadian hospital system to deploy Evolv

Screened

nearly **100,000 patients**, family members, and visitors at two Emergency Departments

Helped provide

seamless security screening for **diverse patient and visitor populations** at downtown and suburban hospitals

Reduced

delays or lines at entrances to Emergency Departments

Helped reduce

Emergency Department staff vacancy rate from 30% to 2.7%

Generated

overwhelmingly positive response from Emergency Department staff and patients
