

# 10 Considerations for Concealed Weapons Detection System Testing

This guide is designed to help you make a confident, informed decision when evaluating weapons detection systems. It clarifies key balance points and outlines a practical, repeatable test plan you can run independently in your own environment.

**01**

Run Testing Yourself within Your Environment

**02**

Decide Sensitivity and Keep it Fixed Throughout Testing

**03**

Test with Real Firearms and Knives

**04**

Test Multiple Positions on the Body

**05**

Understand the Threat Resolution Process

**06**

Account for Outdoor Conditions

**07**

Actionable Analytics for Measurement

**08**

Clarify ConOps (Concept of Operations)

**09**

Check Compliance, Testing, and Standards

**10**

Evaluate the Test

We acknowledge the decision to invest in weapons detection is significant, and Evolv is committed to supporting you throughout the process and beyond. Our team is available to provide a system you can test, offer additional testing recommendations, and guide you through the decision-making process.
