Evolv's Solutions for Efficient Healthcare Screening

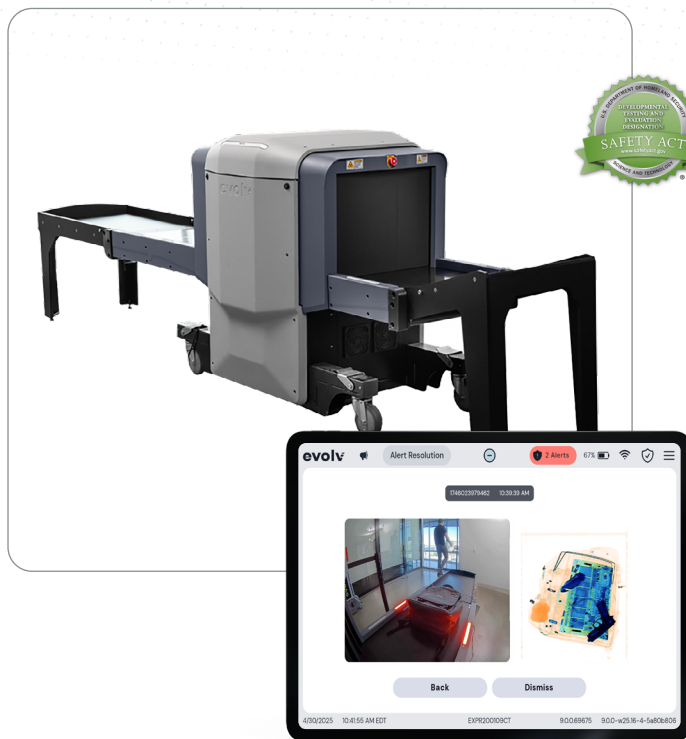

The Evolv Safer Experience System™ offers connected security solutions designed to detect threats and empower staff to resolve them with confidence. It aims to deliver strong security with an efficient screening experience for patients, staff, and visitors.

Evolv Express® uses advanced sensors and AI to help distinguish between many potential threats and many everyday items, like phones and keys*, aiming to provide a dignified, welcoming screening process. Evolv Express aims to give hospitals flexibility to set policies and procedures for screening that align their EMTALA compliance. Relied upon by over 700k hospital staff, patients, and visitors daily, with trust built on:

- **Advanced Detection:** Consistently detects many concealed threats and distinguishes them from many common everyday items.*
- **Directed Search:** Aims to help reduce potential bias in the screening process by providing security operators with visibility into who and where to search via a "Red Box" on the connected Evolv tablet.
- **Minimizing Congestion:** Designed to screen visitors effectively while helping minimize disruptions to traffic flow at ingress points. Evolv Express can screen up to 4000 people per hour for a dual-lane system.*

*Throughput is dependent upon venue sensitivity settings and resolution process.

Evolv eXpedite™ complements Evolv Express® by autonomously identifying concealed threats in bags using AI and high-speed X-ray imaging technology:

- **High Speed X-Ray Imaging:** Designed to allow patients and visitors to place their bags on the X-ray belt, walk through Evolv Express at their natural walking pace, and proceed swiftly upon clearance.
- **Automated Decision-making:** Staff do not have to interpret x-ray images or decide when to stop the conveyor belt.
- **Easy to Operate:** If a threat is detected, the green lights on eXpedite turn red and the conveyor belt automatically stops. Alerts can be sent to the Evolv Express tablet providing the bag's image to highlight the bag containing the potential threat and further x-ray image detail to aid resolution.

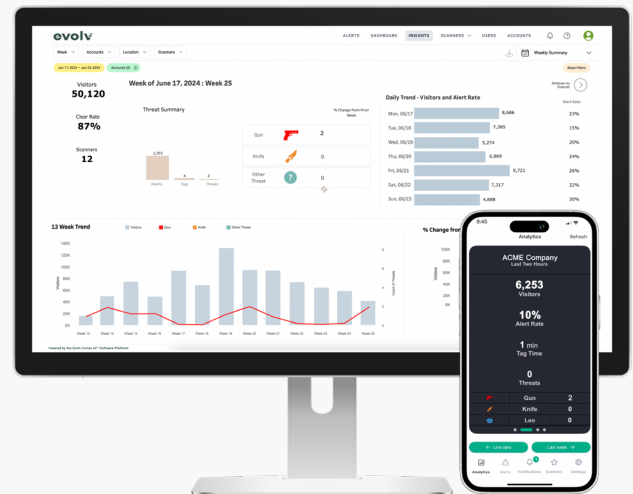

Trusted Nationwide

MyEvolv & Evolv Insights® are designed to provide security teams with powerful web and mobile control over their Evolv systems along with visual dashboards, analytics, and regular automated reports on visitor flow, alarm statistics, and system performance. This helps strengthen security and drive operational efficiency.

- **Remote Monitoring:** See security activity and alerts from anywhere.
- **Prompt Adjustments:** Change scanner settings in real time without standing next to it.
- **Actionable Insights:** Access data and analytics to track trends and improve security performance.

Reviews From Evolv Customers

"Evolv plays a huge role in helping us to feel more comfortable and confident at work... It is absolutely wonderful that we finally have security screening for weapons in our Emergency Departments." – *Anne Haskell, Registered Nurse, Emergency Department, Windsor Regional Hospital*

"[Patients] can have comfort knowing the person sitting to them in the Emergency Department went through the very same security screening. Evolv may help our patients and our staff feel safer knowing an added layer of security is present." – *David Musyj, President and CEO, Windsor Regional Hospital*

"Evolv gives us an environment that enables our doctors and nurses to focus on treating patients and facilitating their healing. For patients, Evolv gives them the assurance that their safety and security while they are receiving care is a top priority." – *Greg Pease, AVP, Security and Outpatient Services, Virtua Health*

"It was mind-boggling to see the first monthly report that we generated with Evolv Insights. I saw the number of weapons we detected, and I thought, 'Wow! This system is amazing'" – *Robert Sherwood, Dir. of Public Safety Technology & Community Based Care, Lee Health*

Why Evolv?

Evolv is a leading security technology company pioneering AI-based screening to help create safer experiences. Our mission is to make the world a safer place to live, work, learn, and play. Evolv Technology has redefined physical security screening, providing innovative solutions that support the end-to-end screening experience.
