## A Flexible Approach to Event Safety

Renting an Evolv system gives your venue AI-powered concealed weapons detection for a single event, a busy season, or a trial run, with no capital purchase, no long-term contract, and no gap in your security program. Deploy the same technology trusted by 1,300+ customers worldwide, backed by Evolv's team for setup, training, and support. Both Evolv Express® and Evolv eXpedite™ have received DHS SAFETY Act Designation as Qualified Anti-Terrorism Technologies.

## Two Systems, One Layered Approach

### Evolv Express®

Walk-through concealed weapons detection at a natural walking pace.

**Strong Detection with Speed:** Detects firearms and other weapons while distinguishing them from many everyday items.

**Directed search:** Guides staff straight to the alert with a "Red Box" on the connected tablet.

**Consistent detection:** AI-driven sensors distinguish real threats from everyday items like phones and keys.

**Manage from Anywhere:** View live activity, make adjustments on the go, from desktop or mobile app.

### Evolv eXpedite™

Autonomous X-ray bag screening that keeps lines moving.

**Quick Bag Screening:** Screen bags at walking speed, allowing visitors to drop their bags and pick them up in a quick, natural motion.

**Strong Detection:** Evolv eXpedite analyzes X-ray images to detect potential threats autonomously.

**Easy Operation:** There's no need to monitor X-ray images or decide which bag to stop; the system handles it automatically.

**Connects to Walk-Through Screening:** Staff can review alerts from eXpedite and Express (walk-through screening) from the same tablet. Separate bag screening takes alerts away from walk-through screening to support smooth entry.

## Why Rent with Evolv?

**No long-term commitment:** rent by the day, week, or season, and return the fleet when you're done.

**Fast deployment:** systems arrive ready to run, with Evolv-trained support for setup and teardown.

**Low-risk trial:** test Evolv at a single event before committing to a purchase or subscription.

**Scales with you:** add or reduce units event-to-event as your attendance and risk needs shift.

**Subject matter expertise:** Evolv's team brings deployment expertise from 1,000+ customers to every event, from site walkthroughs to on-site operation.

## Built for Your Event

**Sports & Entertainment Venues**

**Corporate Events & Conferences**

**Houses of Worship & Community Gatherings**

**Schools & District Pilot Programs**

**Government, Tourist & Public Events**

## Hear from Evolv Rental Customers

"The Evolv team helped us incorporate advanced weapons screening into our security plan. They worked with us on site review and conops, set up the systems and trained our team, and they supported us throughout the event. The systems detected a number of weapons and provided a safer experience for hundreds of thousands of people coming to watch Sail Boston."

– Joseph Lawless, Senior Transportation Security Specialist,  
The Edward Davis Company

## About Evolv

Evolv is a leading security technology company pioneering AI-based screening to help create safer experiences. Our mission is to make the world a safer place to live, work, learn, and play. Evolv Technology has redefined physical security screening, providing innovative solutions that support the end-to-end screening experience.
