

THE HARRIS POLL: TOUCHLESS SECURITY SCREENING TO FEEL SAFE AGAIN

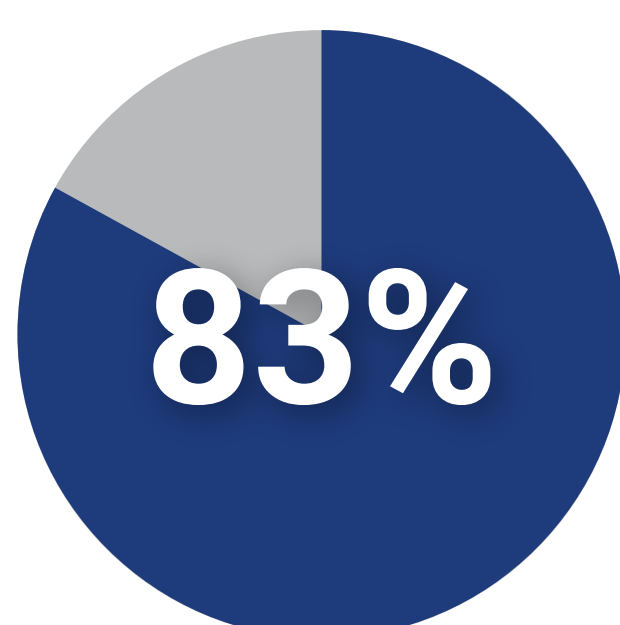

Recently, The Harris Poll surveyed more than 1,500 Americans with a stake in security screening – those who attended ticketed events in 2019, parents of school-age children and workers at large factories, distribution centers, etc.

The findings support a key conclusion – people are looking for effective, efficient, touchless security screening options.

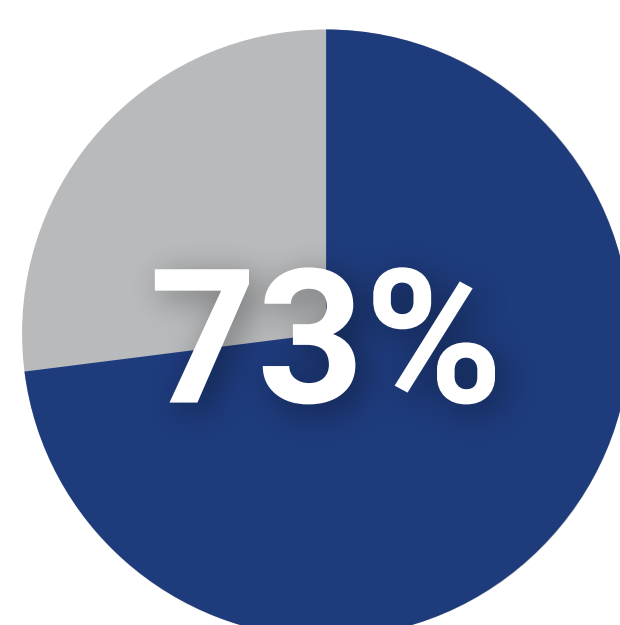

THE SURVEY FOUND:

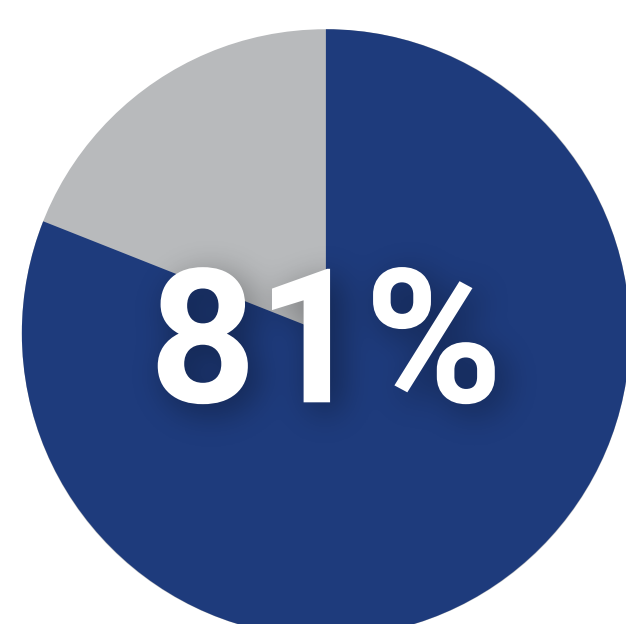

are concerned about mass shootings

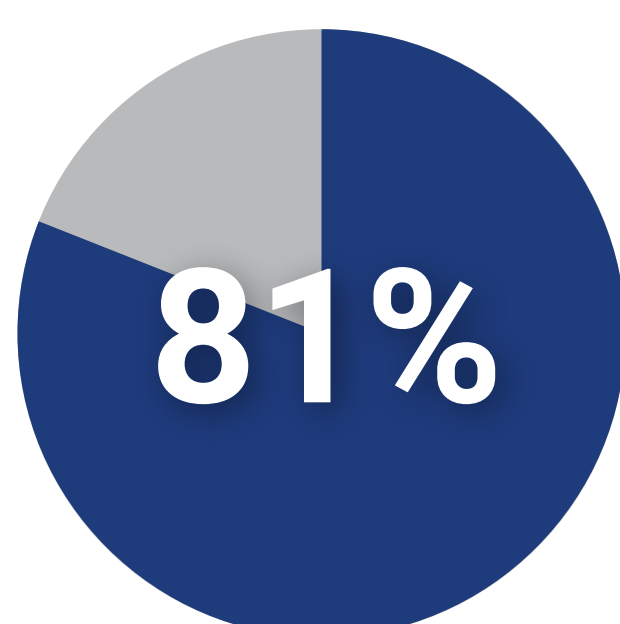

are concerned about COVID-19

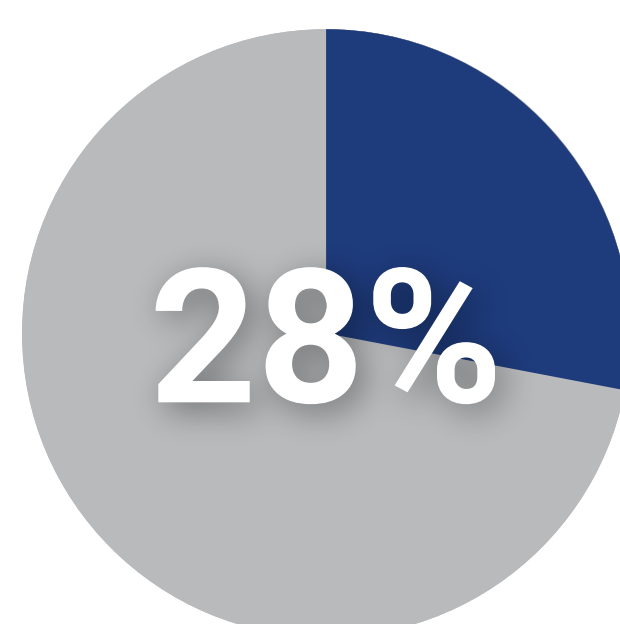

are concerned about terrorism

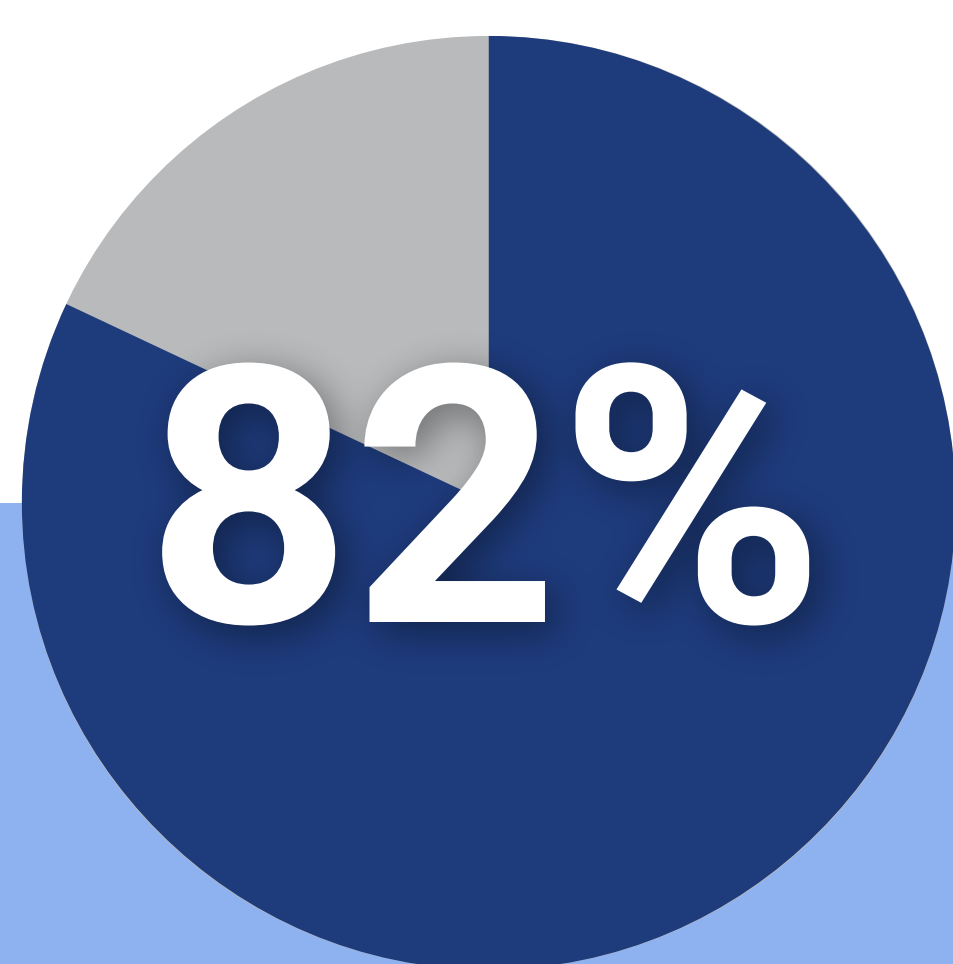

are concerned about protest-related civil unrest or violence

are concerned about street crime

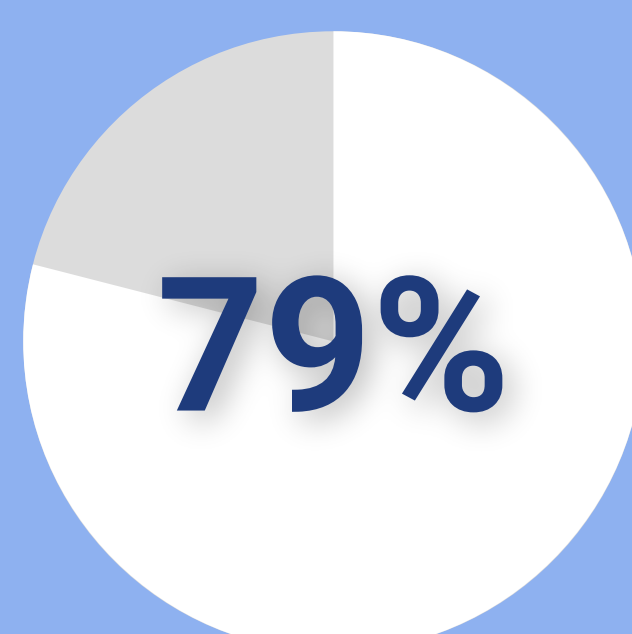

do not feel safe when going out in public

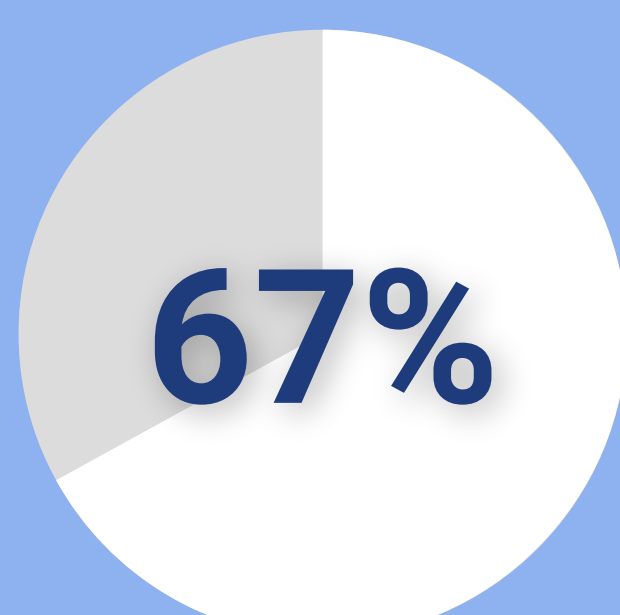

consider metal detector security screening necessary when people congregate

HOWEVER...

79% feel that metal detectors create long lines

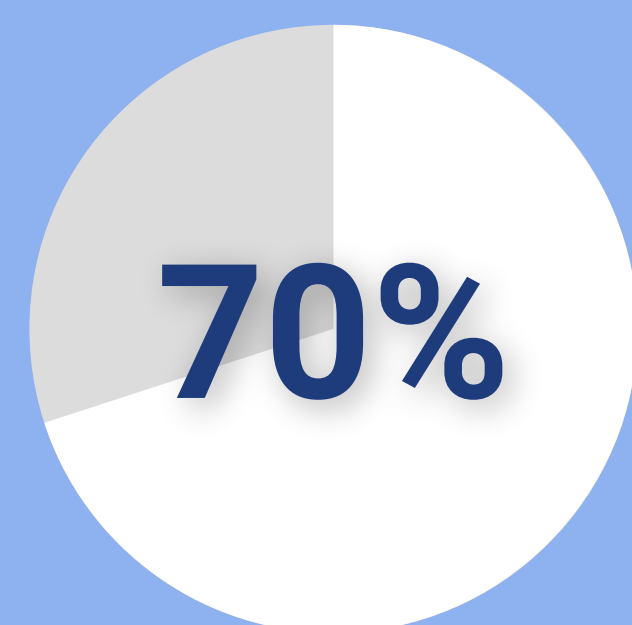

79%

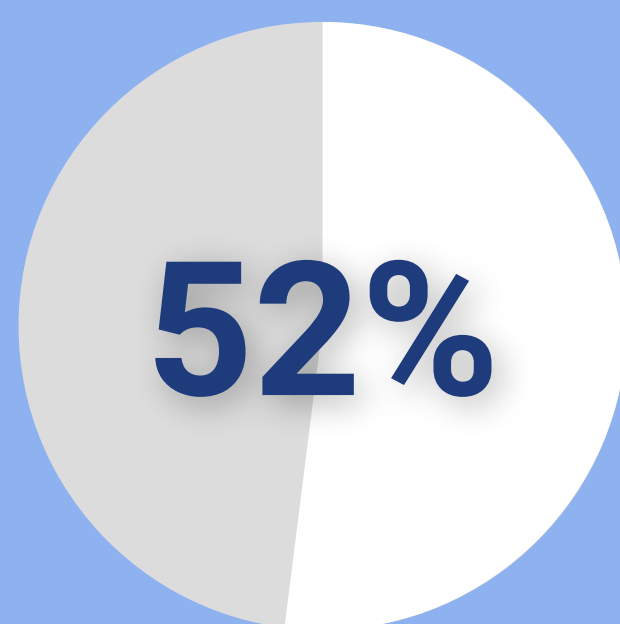

67% feel that metal detectors create crowds that violate social distancing guidelines

70% believe that metal detectors require belongings to be touched by a security guard

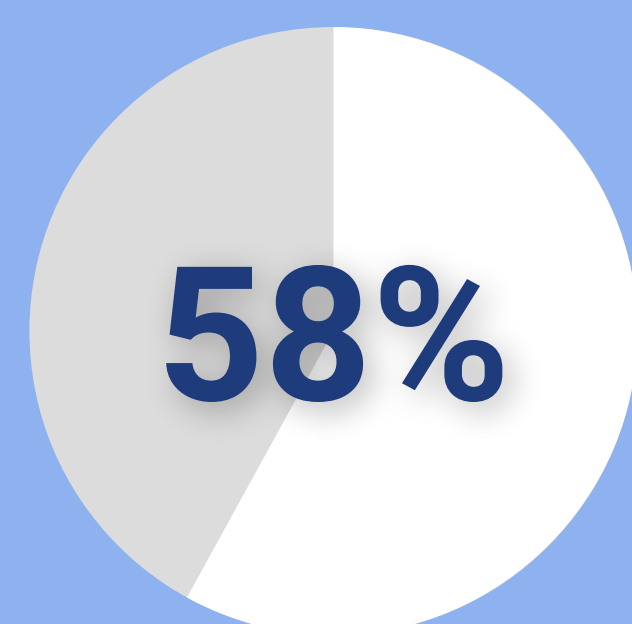

70%

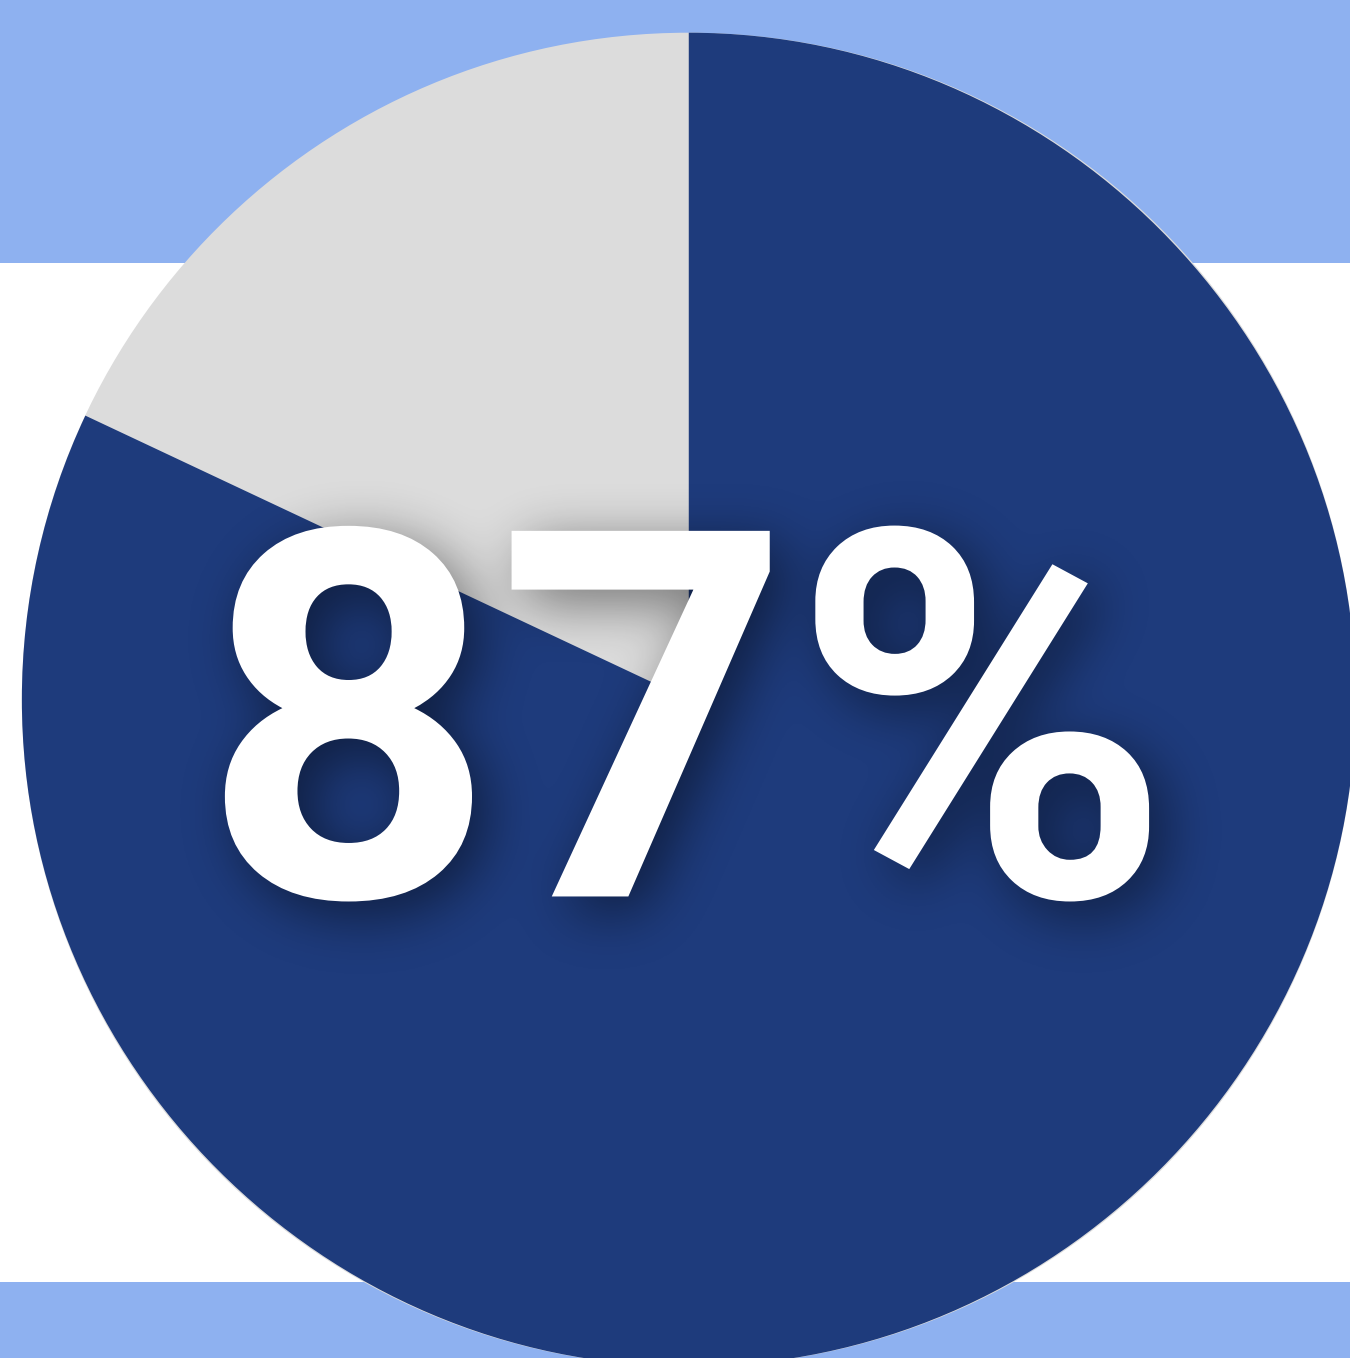

52% believe they require pat down searches

58% believe they generate too many false positives

58%

of Americans would return to a venue with touchless security and temperature screening in place...

**AND EVOLV
CAN HELP**

Evolv Technology is the leader in human security dedicated to making the world a safer place to live, work, learn and play by helping to protect innocent people from mass shootings and terrorist attacks. Evolv's touchless security screening systems have screened more than 50 million people using advanced sensors and AI to accelerate security screening at the world's best venues and facilities.
